

ELLIOT HOSPITAL
MANCHESTER, NH

ENVIRONMENT OF CARE (EOC) REVIEW FOR OBSERVATION STUDENTS

- **The EOC (Safety) Committee** and Safety Director are available to assist with concerns related to safety, security, life safety (fire), emergency preparedness, hazardous materials, medical equipment, and utilities. Hospital Safety policies are provided in the EOC Manual accessible via “IKE” on the Safety home page (<http://ike/safety>)
- In the event that **you are injured** or exposed to a harmful chemical or biological agent, Employee Health **must be notified** and receive a completed incident report ASAP (no later than one business day).
- Students are **required** to visibly **display ID Badges** at **all** times.
- Elliot Health System is a smoke free environment. Smoking is permitted only outside the building in designated smoking areas.
- Per OSHA regulation, safe work practices and controls such as **protective devices must be used** to minimize the risk of **needle-stick injuries** (unless it can be demonstrated that the safer alternatives are not feasible).
- Material Safety Data Sheets (**MSDS's**) for all **hazardous materials** used at the hospital is located in the **Emergency Department**. Sheets may also be accessed via “Safety” Page on **IKE** (intranet).
- **Emergency power** is provided to **Red** receptacles or those labeled Emergency power by back-up generators. Critical equipment should utilize these receptacles.

FIRE (Code Red)

In the event of a fire in the Hospital,

A - **Alarm** (Activate Pull Station **and** call **2111** to alert switchboard of location).

C - **Contain** (Close all doors/windows).

E - **Extinguish** (controllable/incipient fires only) and / or Evacuate as directed (Code Green)*.

Do not use elevators! Your building **location** is indicated on sticker above all fire alarm pull stations.

For All Emergency Codes - Dial 2111
