THE ELLIOT IMAGING CENTER AT MAMMOTH ROAD AWARDED A THREE-YEAR TERM OF ACCREDITATION

Manchester, NH – The Elliot Imaging Center at Mammoth Road has again been awarded a three-year term of accreditation of their Selenia Full Field Digital Mammography Units as the result of a recent survey by the American College of Radiology (ACR).

The ACR, headquartered in Reston, VA., awards accreditation to facilities for the achievement of high practice standards after peer-review evaluation of the practice. Evaluations are conducted by board-certified physicians and medical physicists who are experts in the field. They assess the qualifications of the personnel and the adequacy of facility equipment. The surveyors report their findings to the ACR's Committee on Accreditation, which subsequently provides the practice with a comprehensive report.

The ACR is a national organization serving more than 32,000 diagnostic-interventional radiologists, radiation oncologists, and nuclear medicine and medical physicists with programs focusing on the practice of medical imaging and radiation oncology and the delivery of comprehensive health care services.

Elliot Health System is also recognized as a Breast Imaging Center of Excellence. This special designation is the result of being fully accredited in Mammography, Stereotactic Breast Biopsy and Breast Ultrasound.

The Elliot Breast Health Center offers digital mammography with immediate results. This prompt and definitive approach allows you to consult with dedicated breast health doctors and staff during your visit. Together, we determine the need for further testing and appropriate treatment options. At The Elliot Breast Health Center, Dr. Edward Dalton and Dr. Teresa Ponn work with you in every phase of your care.

The Elliot Hospital was a pioneer in oncology when it opened the first cancer center in New Hampshire in 1966. Today, the Elliot Regional Cancer Center remains a leader in cancer care through state-of-the-art technology, skilled healthcare providers, and an accessible, aesthetically pleasing, comforting environment. Technology, including Stereotactic Radio Surgery and Stereotactic Radio Body Therapy now allows Elliot to treat tumors in the brain and body that were previously inoperable.
