

Elliot Medication Management Clinics

We can help you and your physician manage your Coumadin therapy successfully!

At Elliot, we offer an innovative program designed to help you maximize the benefits of anticoagulant medication while minimizing your risk of complications.

The program is referral-based and works collaboratively with your physician to monitor your prothrombin time (PT/INR) so that you will achieve and maintain desired therapeutic levels. Our specially trained anticoagulation nurse will work one-on-one with you to monitor and counsel you for the duration of your anticoagulation therapy.

Unlike a blood draw, the test is performed using a finger stick test. The nurse will review your results with you and may adjust your dose appropriately at your appointment. Your results are automatically uploaded to your electronic medical record where your physician can review them at any time.
