

Update from the Elliot Breast Health Center

by Marina I. Feldman, MD, MBA, Director, Breast Imaging, Co-Director, Elliot Breast Health Center

In an effort to reduce wait times and improve quality of patient care, we have extended our clinical and screening capacity and upgraded our equipment.

- Our team has grown. We welcome Dr. Jessica Ryan, a Breast Surgeon, and Dr. Carla deVenecia, a Breast Radiologist!

Dr. Jessica Ryan

Dr. Carla deVenecia

- We are now offering a clinical and/or imaging appointment to all new problem patients within 2 business days. All screening mammograms are being reported within 3 business days, with the reports available to the patients directly through my Echart.
- The mammography unit at our Webster Street location (Senior Health Building) has been upgraded to a Tomosynthesis-3D. We have also augmented staffing to accommodate additional screening appointments at the Webster Street location. The facility now has the same high-quality equipment and specially trained mammography technologists as our River's Edge and Londonderry locations. Our specialty trained Breast Radiologists interpret the mammograms for all Elliot locations.
- Raymond mammography has been upgraded to a digital mammography unit.

Please know that there is **NO OUT-OF-POCKET COST** to your patients for a screening mammogram, even if insurance doesn't pay for Tomosynthesis-3D.

As always, all of us at EBHC are available to answer any questions you may have. Thank you for making us your #1 choice for your patients' breast health needs!
