

Getting Started with **MyEChart**

MyEChart is a free tool that provides you with secure, online access to your electronic medical record. It also allows you to:

- Check the status of lab results
- Make appointments
- Request prescription refills
- Update contact information
- Communicate with healthcare providers
- Seek nurse advice
- And more....

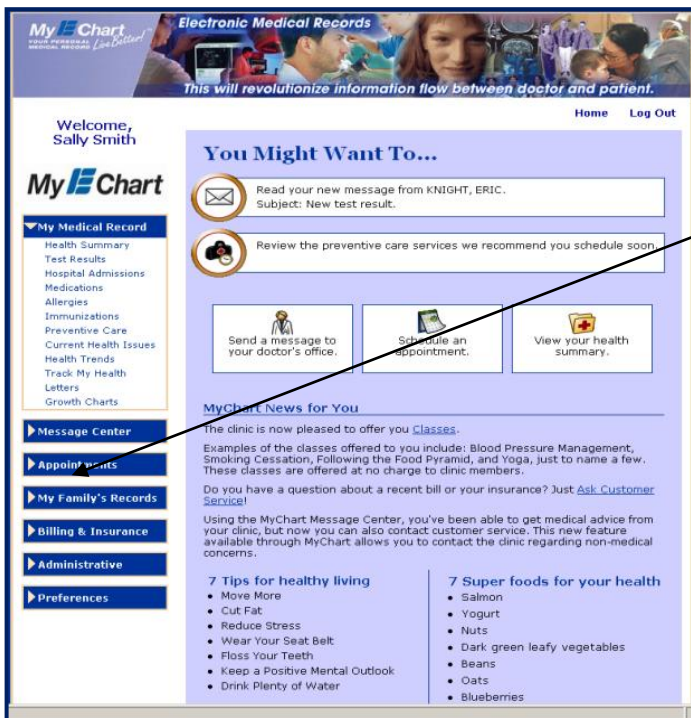

Accessing **MyEChart**

You must obtain an access code from your provider's office. This is a unique identifier that you will use once, along with your Social Security number and date of birth, to log onto *MyEChart* for the first time.

Logging On

Type www.myechart.org into the address bar of your favorite internet browser or visit the EHS website at Elliothospital.org and click on *MyEChart* to access the *MyEChart Welcome Page*.

If you are new to *MyEChart*, click the *New User* link and follow the directions. Once you have logged in for the first time and established your own personal ID & password, you will no longer need your access code. Your access code expires after you use it or after 30 days.

Next, enter your *MyEChart ID & password* then click on the *Sign In* button.

Once logged in, you can navigate the application using the options on the left hand side of the screen.

There is a library of information such as lab data and past medical history.

To View Test Results

Click on the *My Medical Record* option on the left side of the screen. The dropdown menu lists specific options you can choose.

(over)

The screenshot shows a web interface for 'Electronic Medical Records' with the tagline 'This will revolutionize information flow between doctor and patient.' It features a 'Home' and 'Log Out' link. The main heading is 'RAPID STREP (BACK OFFICE)'. Below this is a link for 'About This Test'. A section titled 'Comments from the Doctor's Office' contains a message: 'Your rapid strep test came back positive and you should continue on the antibiotic antibiotic I gave you at your visit until it is finished. I anticipate that the symptoms will decrease quickly but if you don't feel better in 3-4 days, please call our office to let us know.' A table titled 'Component Results' has three columns: 'Component', 'Your Value', and 'Standard Range'. The table lists 'RAPID STREP' with a value of 'positive', 'Internal Q.C.', 'Test Lot #', and 'Exp Date'. There is a 'View Historical Results' link and a 'General Information' section with details: 'Collected: 4/16/2009 8:26 AM', 'Resulted: 4/16/2009', and 'Ordered By: KNIGHT, ERIC'. A 'Back to the Test Results List' button is at the bottom.

Click on *Test Results* to view a list of all your recent tests that your provider released.

To access additional information on a specific test result, click on the name of the test. This opens the test information.

This is an example of a completed Rapid Strep test. The test displays comments from the provider's office, results and general information regarding the completed test.

Should you wish to print the result, *MyEChart* offers a *Printer Friendly Page* link on the upper right of most pages.

If you are not currently on *MyEChart* and would like to participate, please contact your provider's office to request a *MyEChart* access code.

***MyEChart* is not for medical emergencies.** Should you require immediate attention, call 911 or go to your local Emergency Dept.

***MyEChart* response time from your provider's office is typically 2 to 3 business days.**
