

ELLIOT HOSPITAL

CRITERIA FOR STEREOTACTIC RADIOSURGERY AND STEREOTACTIC BODY RADIOTHERAPY

Minimum threshold criteria for requesting core privileges in stereotactic radiosurgery (SRS) and stereotactic body radiotherapy (SBRT) for physicians who completed their Radiation Oncology residency prior to 2006.

Basic Education: MD or DO

Prerequisite:

The physician must be a member of the Medical Staff at Elliot Hospital. The physician should be board certified or admissible in the relevant area of his/her specialty practice. All applicants must have completed an ACGME or an American Osteopathic Association accredited residency-training program in radiation oncology or neurosurgery.

Initial Requirements: (check the pathway you are complying with)

Pathway #1

1. If residency/fellowship training did not include SRS and/or SBRT training, then specific training in SRS and/or SBRT should be obtained prior to performing any stereotactic radiosurgery procedures. Applicants not trained in SRS and/or SBRT must complete an approved hands-on training program in the use of the system. An experienced practitioner approved for the procedure must proctor the first case.

OR

Pathway #2

1. Applicants with previous SRS and/or SBRT experience must be able to demonstrate that they have performed at least ten (10) stereotactic procedures in the past twelve (12) months. A letter of reference from the Chief of Surgery or Chief of Radiation Oncology where the applicant most recently practiced should be submitted. An experienced practitioner approved for the procedure must proctor the applicant through the first case.
